Polycarbonate Terminal Block

Marwell Announces New 15 Terminal Universal Meter Terminal Block

Marwell Corporation is proud to announce the development of our new 15 terminal meter block. The Marwell block is made from the same rugged **Polycarbonate** material used in our meter socket adapter line. The plastic is a time tested composite that will increase the durability of the meter enclosure terminal block. This product addresses the issues of cracking and breaking by using **Polycarbonate** materials that will contribute to the long term strength and flexibility of the meter terminal block. The Marwell block can be retrofit into existing sockets or used in new installations. The Marwell block is compatible with 5S,6S,7S,8S,9S,10S,11S,24S and 26S metering. This product can be ordered for either back or front mount feeds. For further information please contact us at the Factory.
