
Adapter Mounted Remote Access

Ardis, ABB

OrbComm, Scientific Atlanta

Cellular from Global Data or Telentics

Need a quick method of mounting almost anything to a meter socket? Start with a UL Listed, 200A Marwell 1000 Series adapter. Attach the enclosure in your shop where you can control and test the final package. Ship the complete assembly out to the job site for a "PLUG and RUN" field installation. Use the Marwell 1800 base if you have ringless sockets, either way it's rated at 200A continuous* so it does not de-rate the service.

Marwell 1800-4 with Scientific Atlanta OrbComm

- > UL Listed for 600V application.
- > All adapter parts UL Recognized.
- > Rated for 200A continuous service.*
