

## Service Limiters / Service Extenders

Non paying customers a problem? Extend their service in a limited manner. Limited service for limited payment.

The NEW Marwell "Q" Series of service limiters is superior to all previous limiter models. The "Q" Series is based upon the Square D™ QO™ Circuit Breakers. Rugged, stable, field proven circuit breakers that can be purchased throughout the world.

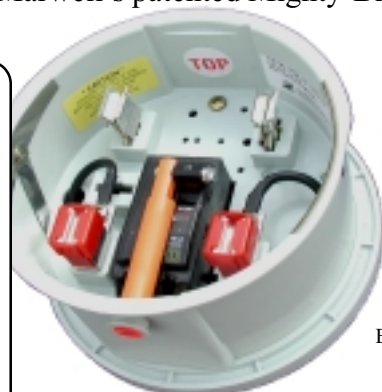

The QO™ breakers are mounted onto a standard Square D™ base assembly that has been fitted into the lower floor of a Marwell adapter. Breaker replacement is a simple operation since neither the Square D™ base or breaker has been modified in any way. The reliability of a QO™ breaker combined with Marwell's patented Mighty-Bite jaw equals the next generation of service limiters.

### ORDERING INFORMATION
