

Adapter mounted enclosure fits both ring and ringless meter sockets !

A new mounting technique from Marwell allows an adapter attached communications enclosure to be installed in either a ring or ringless enclosure. It installs as easily as a meter. No latch ring. No tricks. Just plug it in and drop the cover over it.

It is finally possible to connect and test the communications package in the shop without concern about the socket in the field. This new mount may be used for other devices such as power quality recorders or power failure monitors.

Consider the Marwell M-105FF coupler whenever you are mounting to an adapter. Call for details.

**Model 1000-0-R7 (LEFT)
and 1000-0-R4 (RIGHT),
both shown with M-105FF
coupler and 2 X 3 X 5 inch
FIBOX enclosure.**
