

## Yard Light Adapter

Many utilities lease yard lights to their customers for a flat monthly fee. The power consumed is un-metered and included in the monthly rental. How do you install them if the home has underground utilities? You may be able to attach the light to the house or garage, but how do you connect to the un-metered power?

Marwell has a solution. The Marwell yard light adapter.

Installs under the meter and provides a fused power source for the yard light. Any standard 1/2 inch conduit fitting will install in the bottom flat.

- \* DOES NOT de-rate the service.
- \* 200A Continuous in 200A Continuous Sockets.
- \* White 18 inch lead to connect to system neutral.
- \* Fuse holder with 5 Amp fuse, # 12 wire.
- \* Terminal block for #12 wire.
- \* 1/2 KO hole open at 6 o'clock
- \* UL Recognized SPRING LOADED JAWS.
- \* All components UL RECOGNIZED
- \* 4 or 5 jaw socket styles.
