

* FORMS CONVERSION *

Bring us your odd-balls.

Special adapters are a way of life at Marwell. We will help convert your oddball polyphase meter sites to accept modern auto-ranging meters. Marwell extender adapters fit ring or ringless meter sockets and effectively convert nonstandard meter sockets to accept standard meter forms. Just program the meter to fit the new application. Installs in seconds. Common types are listed below.

Let us build one for you.

Have you ever needed a 3S or 4S meter with a modem or mass memory? Have you considered the advantages of meter inventory reduction through the use of wide ranging programmable meters? Do you have any odd-ball meters on your system that you would rather not have? It is sometimes easier to use a auto-ranging programmable meter for nonstandard applications than it is to order and inventory the specials and odd-balls. Just carry this concept one layer deeper through the use of forms conversion adapters.

FORMS CONVERSION ORDERING INFORMATION

<u>MODEL</u>	<u>SOCKET WIRED FOR:</u>	<u>USE METER:</u>
1000-0-R8-SP-3S-2-5S	3S	5S
1000-0-R8-SP-4S-2-5S	4S	5S
