- * UL Listed polycarbonate material.
- * UL Recognized components.

The NEW Marwell Series 200 CT Jacks provide both CT probe points and fused potential connections.

In July 2000 we introduced the 100 Series of CT-JACKs, basic jacks to help test CT's that are directly connected to meter sockets without test switches. They are still available.

THE ORIGINAL

CT-JACK-103
For any socket with 3
currents.
600V Rating.

Now enhanced with fused potential circuits, the Marwell 200 Series Jacks complete the family. Do you need a special version? Just send us a sketch, specials are the norm at Marwell.
