

Service Limiters for Winter NON-PAYS

In many parts of the country utility cash flow is hindered in the winter because “slow pay” and “no pay” collections are slowed. Some states have moratoriums - limiting cut-offs during the cold weather season. Consider Service Limiters from Marwell. They are actually service extenders, they extend limited service to customers that need a little help.

IMPROVE COLLECTIONS

1000-R4-BLP-TIMER Full current for limited time
Timer based Service Limiter. Turns the service off and on at pre-determined times throughout the day. Great for electric heat on a separate meter or put it on the whole house to really get some attention. Rated for 200 Amp Service at 160 Amp continuous, housed in a Marwell 3-3/4 meter offset extension.

E/Z 15310-Q 120 VAC only limited service, no 240 VAC
Circuit breaker based Service Limiter. Turns the service off when the current rating of the circuit breaker is exceeded. Must be reset by the customer using the reset button provided on the bottom. For 3W residential service.

E/Z 15410-Q Double pole provides 240 VAC limiter service
Similar to E/Z 15310 except with double pole circuit breaker to provide 240 VAC service at limited current. For 3W residential service.

DON'T CUT - JUST LIMIT

Options

- Available in 4 and 5 jaw models
- Current ratings from 10 to 30 Amps
- Custom variations to specification
